

The system to create  
spatial simplicity with  
functional coat racks

**Gardelux® 2**

The clear and strong lines of aluminium tubing in combination with black hooks and black wall supports are characteristic of the Gardelux 2 coat rack system. It is a modular system where the customer has the choice between two options: laying down items (e.g. hats) and / or hanging items (coats). Each of these functions can be extended separately to the size the customer requires.

## Gardelux 2 systematises coat racks

The system can be supplied as a wall mounted unit, as a freestanding unit and in combination with seating arrangements (see the Accessories Brochure).

Wall mounted coat rack model 1

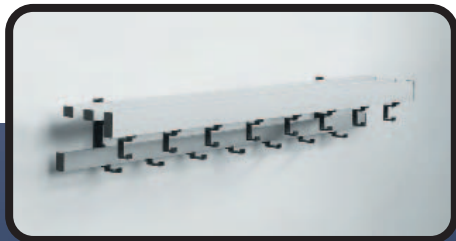

Wall mounted coat rack model 3

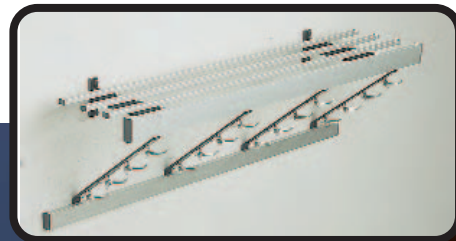

Various hat and coat hooks.

*Wall mounted rack model 6  
with recessed coat hooks bar.*

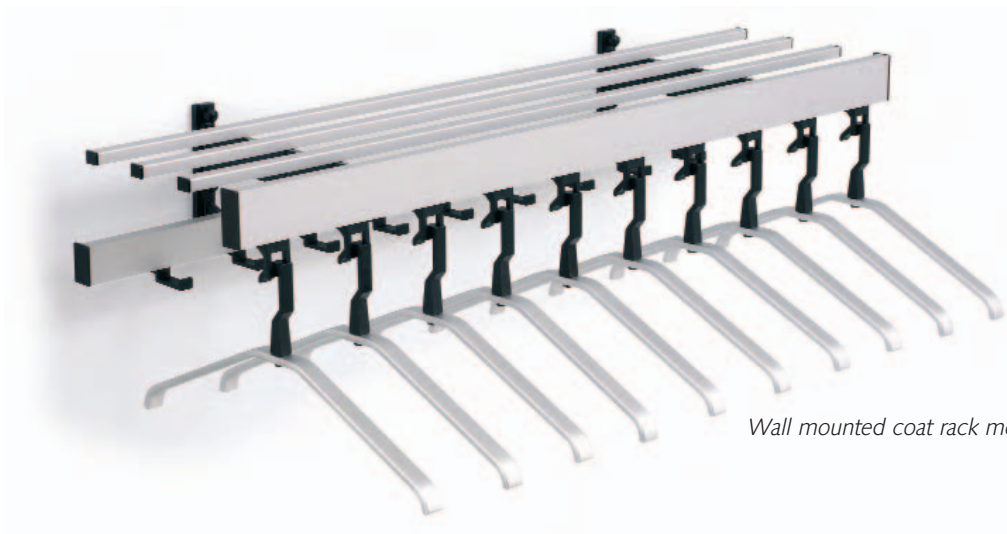

*Wall mounted coat rack model S.  
Identical with model 6, but with stronger and  
heavier tubes.*

*Wall mounted coat rack model R.  
A very compact coat rack with space for 32  
coats per metre.*

## **Adaptable in size**

In fitting out a dressing-room or wardrobe with Gardelux 2 the choice of model is dependent on the storage capacity required. In a small room more hanging space can be created by adding, for instance, an extra aluminium strip with single or double coat hooks. (See illustration) Size of the units is no problem. Gardelux 2 can be supplied in any length.

*Wall mounted coat rack model 10*

*1264 Non-removable coat hanger*

*Wall mounted coat rack model 9*

*1263 Coat hanger  
with trouser bar /  
suit hanger.*

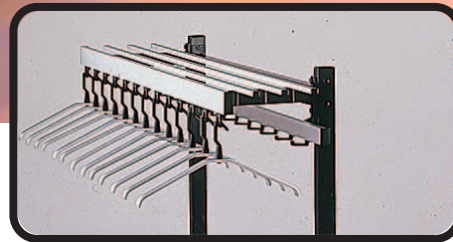

*1262 Standard coat hanger*

## **Installation options**

The Gardelux 2 system can be supplied in four different hat- and coat hook models and three varieties of coat hangers. Especially for schools and similar institutions the tubes of coat racks and hat shelves can be produced in a stronger and heavier grade (model S). The standard mid-point to mid-point distance of the coat hooks is approximately 15 cm and of the coat hangers, if required in combination with coat hooks, 10 cm (deviations possible)

## Strong and stable freestanding units

Models 6, 9, 10 and R can be installed on a freestanding frame resulting in independent units. This configuration is especially suited for situations in which wall installation is either not desired or not feasible. The height of the frames ranges from 175 cm, via 160 and 130 to 110 cm. Frames can be supplied in six different colours and come standard with adjustable feet. Other options are castors or adjustable floor anchors. Frames can be joined to form larger units.

*Model 10. Single-sided freestanding on frame*

*Model 6. Double-sided on frame*

*Model R. Double-sided on frame*

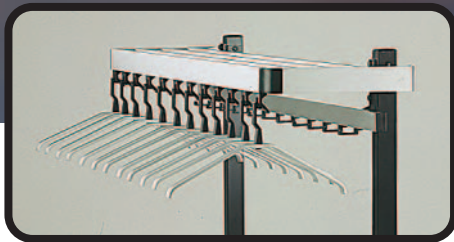

In order to make the best use of a given space it is possible to mount the coat rack in a corner or between two walls (up to a maximum of 120 cm). For safety reasons the side ends and the top ends should be capped.

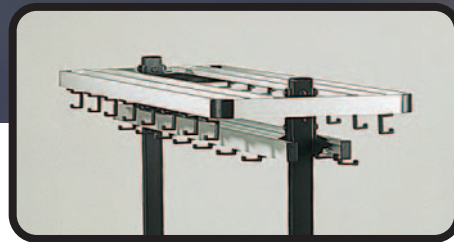

*Corner configuration*

*Installation between two walls*

*Side end cap*

*Top end cap*

## Colours Gardelux 2

The tubes and the coat hangers come standard in anodised natural aluminium or in light bronze. The wall supports can be supplied in six different frame colours.
