

The functional elegance
of a coat rack system

Gardelux® Allure

An ideal system in modern project development as far as suitability and appearance are concerned. The foundation of the system is an oval shaped tube with coloured strips in combination with black plastic caps and hooks. The result is a bright and light look with a lively character.

Gardelux Allure highlights every space

The configuration of Gardelux Allure is extremely economical both in permanent and in temporary or flexible locations.

Wall mounted coat rack model 6 with inward facing coat hooks.

Model 8. Wall mounted coat rack with three coat hangers.

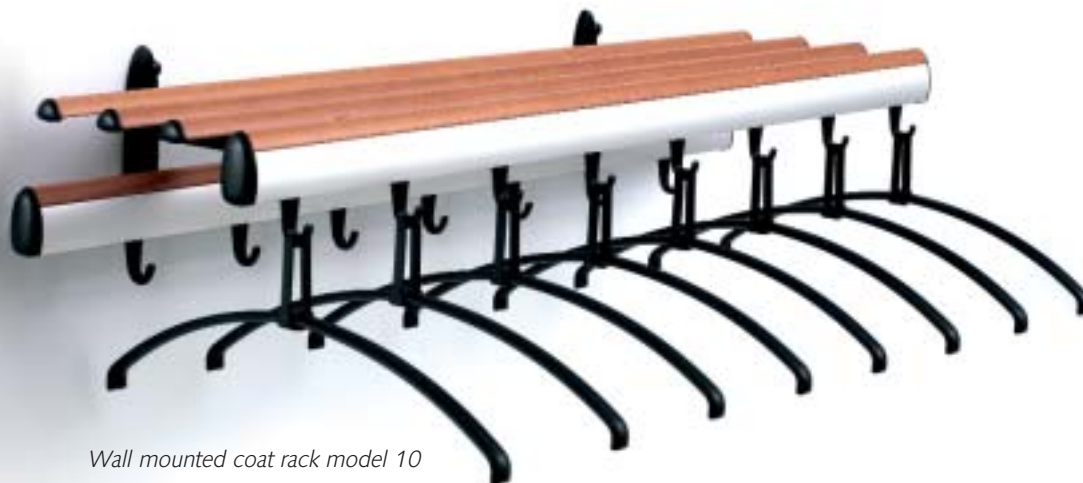

Model 8a. Wall mounted coat rack with six coat hangers.

Wall mounted coat rack model 11 with magnet and two coat hangers. Suitable for positioning on steel cupboards or walls.

A “mate” for every wall.

Coat or jacket, put them away tidily. The Gardelux Allure wall mounted coat rack system is available in three models. An ideal solution for any office.

Installation options

There are five models of wall mounted coat racks, each of which can be supplied to the requirements of the customer. The most basic configuration consists of a single tube with coat hooks. More elaborate configurations consist of a multiplication of the number of tubes. The tubes can be supplied with eight or ten coat hooks / coat hangers per metre. For safety reasons the front row can be supplied with coat hooks facing inwards.

Allure stands tall and stable

Models 6, 9 and 10 can be supplied as single-sided or double-sided freestanding coat racks. The height of the frames ranges from 175 cm, via 160 cm and 130 cm to 110 cm. The frames are available in six different colours and are supplied standard with adjustable feet. Another option is on castors. For safety reasons, especially for schools and similar institutions, coat racks can be supplied with coat hooks facing inwards. Several frames can be joined together.

Model 10. Single-sided on frame

Model 6. Double-sided on frame

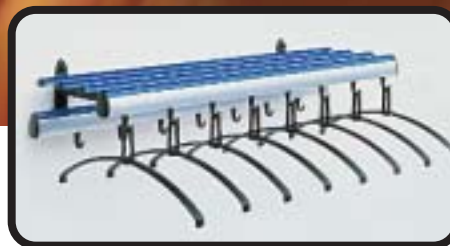

Natural aluminium and black with a colourful accent

The colours of Gardelux Allure are mainly determined by the natural anodised aluminium tubes and the black plastic caps. The neutral base turns the coloured strips into a prominent feature of the Gardelux Allure system. Apart from these six different lacquer colours the strips can also be supplied in anodised aluminium and in real wood beech or cherry veneer. It is also possible to have the strips supplied in a colour required by the customer.
