

The distinguished design  
of a coat rack system  
**Gardelux Colorline®**

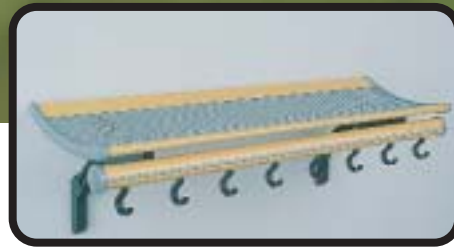

Round shapes and bright colours characterise the Gardelux Colorline system. The curved shape has been used in the tubes as well as in the hat shelf, the coat hooks, the coat hangers and the matching accessories. It is a balanced basic design available in a variety of models and colours.

## The distinguished look of a stylish coat rack system

The Gardelux Colorline coat rack system will do you proud. And the system is user-friendly: recessed aluminium coat hooks bar and high-grade plastic coat hangers. The slightly curved perforated hat shelf guarantees the visibility of the objects placed on it, and has the added advantage that they will not drop off easily.

## **Adaptable in size**

The most basic model consists of a single tube with coat hooks. More elaborate systems consist of, for instance, a combination of a hat shelf and / or an extra bar with coat hooks and coat hangers. All coat racks can be supplied in the size required by the customer. From a standard coat rack to several metres of clothing storage racks in a cloak room. The maximum length is four metres. All models are mounted with invisible fasteners.

*Wall mounted coat rack model 7 with coat hangers for installation between two walls*

## **Installation options**

There are eight models of the Gardelux Colorline coat rack system designed for a variety of situations. Models 6 and 7 are suitable for installation between two walls (max. 150 cm). The distance between the coat hooks or coat hangers is 12,5 cm. Separate from this configuration is the wall mounted coat rack model 8 which has a more compact format and is especially suited for installation in offices.

## Accessories adorn the coat rack system

Accessories in the same design and colour scheme add the finishing touch to the coat rack system and create a functional surplus value in representative areas. Mirrors with or without shelves, resp. with or without umbrella stands. Available is also a freestanding coat rack with ten coat hooks in combination with an umbrella stand. And, if required, with three additional coat hangers.

## The colours in a row

The six standard colours of Gardelux Colorline are determined by the tubes which have been epoxy powder coated. The accent colours of the tubes, the coat hangers, the caps and the hat shelf are either black or aluminium. A colour combination can be chosen by the customer. It is also possible to request a specific colour fitting the house style of the customer.
